THE DEMOCRATIC WHIG. BY RICHARD HENRY BROWNE. There is every appearance of the effects of the Auli Regulators in the approaching con-test in this State being crossed with trausthat success. All that is required to ensure the senergy and organization. Changes are rapidly taking place, and hundreds, who voted with the Republicans at the last election, are heartily ashigned of the position they occupy. The disastrone result of that election, in the robbery of the public treasury, and the natori-ous incompetency at the Governor, are justly attributable to the party who selected such nstruments to carry out their disgraceful doc their ranks, and the rancorous fuelings, which point their invectives against each other, have utterly discusted the virtuous and patriotic por lings and open profligacy. The Anti Reputi ators have only to make a proper use of these tworable circumstances to accomplish the complete prostration of a party, which has inflicted upon our State so many evils and such a lead of infamy. The feelings of the people have been already partially aroused to the enormities, which have been committed by the Repudiators; and, if the Anti Repudiators will but exercise that spirit and activity which their duty to their State requires them, they must succeed. Let the people be awacaned to a correct knowledge of the profound disgust with which the course of Musissippi is viewed by all, who place a proper estimate them but see with what scorn and expremps th character of our State is treated throughou the civilized world, give them but light, an they will comen to everlasting inlamy the par ty, which has attracted so much ignominy

Let every Bon I payer be alive to the importance of the approaching contest, let every one feel that upon his individual exertions the refemption of his State and the success of its party depend, and our victory will be an easy

MEDICAL DEPARTMENT. The plan of the instruction in this depart-nent of the University presents peculiarities to a found in no other-chool of Medicine in the Juion. The lectures commence on the of October, and terminate on the 4th of July

Owing to the length of the session, which embraces a period of ains months, three Profeasors are enabled to perform all the duties which in other medical institutions are usually assigned to ext, and the students are seldom conired to attend more than two lectures or the same day. By this arrangement, the stat-dents have an opportunity of being well groun-ded in Austomy, Physiology, and other elemen-tary branches of Medical Science, before they investigate their applications in connexion h the study of the practice of Vedicina an

Surgery.
Immediately before each lecture, the students are subject d to a full and rigid examination on the preceeding lecture, or on portions of approved text-books.
